PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building scalable, high-performance web applications and production-ready backend systems. Strong expertise across the full development lifecycle, delivering clean, efficient, and maintainable solutions using modern technologies. Actively focused on AI-driven systems, with practical experience in building RAG-based intelligent solutions and LLM-powered systems for business insights and data understanding. Skilled in working with embeddings, vector databases, and retrieval pipelines to develop context-aware AI applications that transform raw data into actionable intelligence. Strong problem solver with a solid foundation in system design, backend architecture, and software engineering principles. Passionate about building intelligent, production-grade systems that combine modern software engineering with applied LLM and AI technologies to solve real-world business problems.

PROFESSIONAL EXPERIENCE

Aunkur Ai , <i>Full Stack Software Engineer</i> - Built a full-stack agriculture platform supporting farmers from onboarding to harvest, including soil analysis and data driven crop and treatment recommendations. - Delivered AI driven, agentic solutions for agricultural partners, enabling automated insights and intelligent decision support at scale. - Developed RAG and LLM based intelligence systems for contextual agricultural insights, including weather aware recommendations for crops, fertilizers, and treatment planning. - Developed scalable backend services for farmer data management, loan support, and system operations, ensuring reliability in real world use. Tech Stack: <i>React.js, Python, FAST API, RAG, AI Agent, TypeScript, Node.js, GraphQL, MS SQL</i>	10/2025 – Present Gulshan,Dhaka
Deep Mind Labs Ai , <i>Software Engineer (Front-End)</i> - Completed a web development internship at CodeSoft, contributing to the creation of responsive and user-friendly websites using HTML and CSS. - Developed and deployed multiple front-end projects, focusing on clean design, cross-browser compatibility, and optimized user experiences. Tech Stack: <i>React.js, TypeScript, Next.js, Tailwind CSS, JavaScript, CSS, HTML</i>	07/2025 – 10/2025 Uttara,Dhaka
Outlier , <i>Front-End Developer for AI Training</i> Built responsive, user-friendly interfaces using React, Tailwind CSS, and HTML for real-world projects at Outlier Tech Stack: <i>React.js, Next.js, Tailwind CSS, JavaScript, HTML</i>	11/2024 – 05/2025 Remote
CodeSoft , <i>Web developer (Intern)</i> - Completed a web development internship at CodeSoft, contributing to the creation of responsive and user-friendly websites using HTML and CSS. - Developed and deployed multiple front-end projects, focusing on clean design, cross-browser compatibility, and optimized user experiences.	08/2024 – 11/2024 India

EDUCATION

Bachelor of Science , <i>Rajshahi University of Engineering and Technology (RUET)</i> Electronics and Telecommunication Engineering 7th Semester GPA: 3.92 8th Semester GPA: 3.97 CGPA: 3.60/4.00 (Position: 6th in Department)	01/2020 – 06/2025 Bangladesh
Higher Secondary , <i>National Ideal College</i> Science GPA: 5.00	06/2017 – 06/2019 Dhaka, Bangladesh
Secondary , <i>National Ideal School</i> Science GPA: 5.00	01/2016 – 02/2017 Dhaka, Bangladesh

TECHNICAL SKILLS

Machine Learning & AI: RAG Systems, LLMs, Embeddings, Vector Databases, Chunking, Semantic Search, Redis, Docker

Web development: Next Js, React JS, Tailwind CSS, HTML, CSS, JavaScript, TypeScript, Express Js, Node JS, GraphQL

Coding: Python, JavaScript, C, C++

Data analysis, MySQL, MS SQL

GitHub

Microsoft Word, PowerPoint

LANGUAGE

Bengali Native	English Proficient	German Beginner	Hindi Conversational

ACADEMIC SCHOLARSHIPS

RUET Academic Excellence Scholarship

- Awarded in all eligible semesters (4 times, 2020-2024) for consistently outstanding academic performance, ranking among the top students in the department.

ACHIEVEMENT

TOP PROJECT AWARD

- Received the Top Project Award for developing an AI voice assistant, demonstrating strong skills in natural language processing and software development.
- Engineered a dynamic AI voice assistant with a memory feature, enabling it to learn from user interactions and provide personalized responses.
- Designed an intuitive and interactive user interface, integrating voice recognition and task automation to improve user experience and system efficiency.

EVENT MANAGEMENT AWARD

- Acknowledged with a Professional Volunteer Certificate for outstanding service at the Etechnovation event, recognizing my contributions and dedication to the success of the event.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT (COURSERA)

- Programming Foundations with JavaScript, HTML, and CSS - Duke University: Enhanced programming skills by building projects using JavaScript, HTML, and CSS for full-stack web development.
- Introduction to Web Development with HTML, CSS, JavaScript - University of London: Gained a thorough understanding of web development, covering key front-end technologies.
- Introduction to Web Development - BitDegree: Acquired a solid foundation in front-end web development with a focus on HTML, CSS, and JavaScript.
- Python Programming Essentials - Rice University: Acquired essential Python programming skills, including data structures, control flow, and basic algorithms.
- Completed the Google Technical IT Support Certificate through Coursera, gaining comprehensive knowledge of both hardware and software fundamentals, including troubleshooting, system administration, and network management.
- Google Cloud Platform Fundamentals: Core Infrastructure - Google Cloud: Developed an understanding of Google Cloud services, infrastructure management, and cloud computing principles.

PROJECTS

AI Business Insight Agent (Insurance Domain)

Built an AI agent to generate actionable business insights for insurance workflows, enabling data driven decision support in real world scenarios.

Rizik App – AI Business Recommendation System

Designed an AI driven recommendation system for shop management, providing intelligent business insights to support operational and decision making processes.

Web-Integrated Machine Learning Framework for Multi-Disease Diagnosis Using Ensemble Models and Feature Transformation

Artificial Intelligence Based Smart Voice Assistant

RAG Based Farming Recommendation System

Developed a Retrieval Augmented Generation (RAG) system delivering context aware agricultural recommendations based on crop, soil, and environmental data.

Hungry Kid

- A Clean and Responsive Restaurant Website

MovieSpot

- A Dynamic Web App for Searching and Recommending Top-Rated Movies
